Fund overview

Be like a venture capitalist and diversify your portfolio by investing in disruptive ideas and innovations that will shape our lives today and in the future. This fund is comprised of 50 US-listed companies, headquartered globally, with the highest Early-Stage Composite Innovation Score as assessed by the AI smarts of Kensho. The fund provides exposure to 17 disruptive sectors such as smart grids, cleantech, cyber security and space exploration; these are the Moonshots. Market capitalisation and liquidity are key criteria for index selection; with minimum company size being \$100M. These international high-growth companies are a mix of ground breaking start-ups and established innovative corporates each with the possibility for exponential potential. This fund tracks the S&P Kensho Moonshots Index.

Benefits

The Kernel S&P Kensho Moonshots Innovation Fund can be used in a variety of investment strategies:

- Thematic exposure to disruptive technology
- Satellite pick to enhance long term returns
- Portfolio diversification

Radware	IL	2.67%
Adaptimmune Therapeutics	GB	2.63%

Impact

Carbon Footprint: 7 metric tons per USD1m valuation. 93% lower than benchmark⁷. Operational and first tier supply chain greenhouse gas emissions.

Carbon Efficiency: 48 metrics tons / USD1m revenue. 82% lower than benchmark⁷. The index's absolute owned greenhouse gas emissions divided by the sum of revenues.

The Top 10 investments make up 34.45% of the fund

Index Eligibility Criteria

To qualify a company must meet the following criteria:

1. Be listed in the US on the NYSE, Nasdaq or Cboe.
2. Have a minimum security level unadjusted market capitalization of US\$ 100 million and a maximum security level unadjusted market capitalization of the 90th percentile value of stocks meeting the Security Type and Exchange Listing criteria.
3. Have a minimum three-month average daily value traded of US \$1 million.

From here the eligible constituents are ranked by the Early-Stage Composite Innovation Score. The highest ranking 50 companies are selected and form the index. More can be read on the methodology [here](#).

Further information

The information is not investment advice. Kernel has taken reasonable steps to ensure that the information in this document is accurate and up-to-date. Kernel does not accept any responsibility for any error or omission or for any loss resulting from the use of this information, except to the extent required by law.

¹ 12 month Yield is the last 4 quarterly distributions divided by unit price 12 months ago. This is the experience an existing investor would have had.

² Indicative Dividend is the index calculation of the underlying dividends in the last 12 months divided by the current valuation

³ Management fee before rebates.

⁴ 12 month volatility is the standard deviation of daily returns, annualised by multiplying by square root of number of periods. The same measure for 5 years is used for the Risk Indicator.

⁵ Performance assumes distributions reinvested. Net index difference is after management fees, stamp duties, and transaction costs

⁶ Growth of a hypothetical investment in the index (no allowance for fees or taxes) and no further contributions

⁷ While a benchmark for this innovation fund is difficult to identify, we have used the S&P Global BMI for comparison purposes.
